👤 PROFILE

Business management in International business & supply chain graduate. I am a hardworking diligent individual who is very interested in how businesses are managed and the future of businesses, especially with the advent of technology. I volunteered at Sunshine home at the Institute of Mental Health that caters to the elderly.

I studied at Hougang Secondary and took GCE O' Levels examination. I also took part in school's volunteering programme to go for voluntary work.

I obtained important skillsets such as microsoft suite programs, Tableau for business analytics in my tertiary education in Nanyang Polytechnic.
